

2 remote wireless calling system (FBXWACS02)

Made in INDIA

Indoor range: 20 - 30meters

Battery operated
wireless remote
controllers = 2 nos.

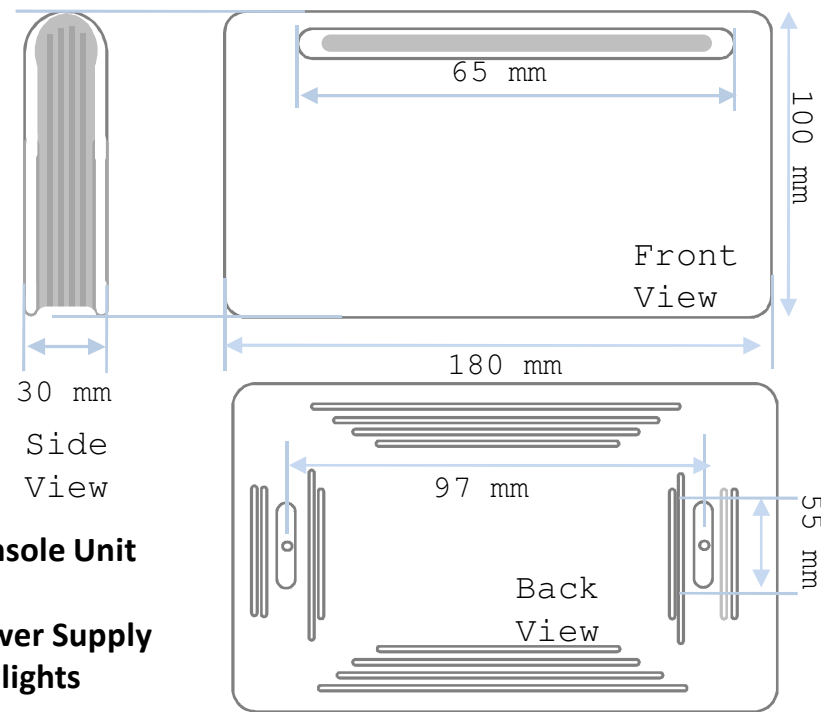

Receiver indicator
with beeping sound
12VDC adapter
operated

Remote battery: 23A/12VDC
No Line of Sight Communication
Battery Life around 1 year

Receiver Console Unit

- Yellow: Power Supply
- 2 indicator lights

Step1: Connect the receiver console to 12VDC adapter

Step2: Distribute the remotes to distant individual users / calling parties

Press **CALL** to alert the attendant

Once the calling party has been attended, pressing the **CANCEL** button disengages the number from the console

Center button of the remote is OPTIONAL (typically CALL) or emergency beep sound

Receiver Console:

- Whenever CALL is pressed beep sound on receiver
- Yellow light for the indication of power
- 2 red light for the indications of each of the remotes
- Each remote as a beeping sound
- Pressing the CANCEL button on the remote deactivates the call

Precautions:

- Do not drop or apply jerk. Internal electronic circuits are fragile
- Do not connect adapters other than supplied by FORBIX SEMICON

Range of communication:

The range of communication of the remote controllers and receiver console is around 100-120 meters open Line of Sight (LoS) conditions (outdoors). Indoors, fully furnished house/building, the range drops to around 20-30 meters.

Remotes can be placed in jacket provided or can also be hanged around the neck of a patient or caller or fixed on bed or table
